First i would like to say that i am using mastercam x7 version 2.x. I have recently updated my PC (XP, 64bit) to Windows 10 and i face a strange problem. When i try to run Mastercam X7, this happens :
Start: Mastercam X7 Debug window : "" The application is not valid Here is the error window :
Exception error : Exception error { Child process exited after 0 ms (0 row(s) affected) } I have pasted the screenshots : I checked the application path, my C: drive is full (2GB RAM + 2 GB of C:,...) I was wondering if it might be the problem, since it has a high process priority at 100%, but why it happens? Can i reinstall it and then launch it again? It's not the first time that i install and then launch Mastercam X7, but it's the first time that i get this specific error. I tried to uninstall it and then reinstall it, but i had the same problem. Any ideas? I have Mastercam X7 version 2.1-4.0 Thanks A: I'm guessing that you don't have a recovery disk or a Windows 10 recovery image with you. Windows 10 cannot be upgraded in place. The only thing you can do is perform a clean install. There are ways to upgrade it from Windows 8/8.1 or Windows 7 but that's not possible for you given that you don't have an image. Free laser projection system Technology allows holographic microscopes to explore the living cell deep inside with incredible resolution EVANSTON, Ill. — When a cell is grown in a Petri dish, scientists can observe the activity of only a tiny fraction of the cell at any given time. In fact, biologists have largely given up trying to look inside an animal's cells because the tiny windows that are available are not powerful enough to allow scientists to see the true structure and behavior of the cellular interior. Now, a new technique, which involves using light to project into a petri dish, can help scientists get a much more detailed look inside living cells. Northwestern University researchers have created a free laser projection system that they have tested in the lab and demonstrated to other scientists. Unlike existing projection systems, which cost hundreds of thousands of dollars, this new system is low cost
